

Nikola Tucaković

Frontend && Web Developer

Software Developer

Byteout Software (DEC 2014 - PRESENT)

Currently working as a Frontend Developer in Byteout's product team. Startup culture expands over the official roles, which gives me the chance to contribute to building products from scratch on various aspects.

Over the years I've worked on both Frontend and Backend in various technologies of which the most used were Drupal 7 and 8, Symfony, Angular 1.

Junior Frontend Developer

Byteout Software (FEB 2014 - JUL 2014)

After internship I started working as Junior Frontend Developer on Drupal and Symfony projects.

📖 *Nikola's work for Byteout Software during a period of 6 months surpassed all expectations.*

His position was "junior frontend developer" but his performance was of a senior level. All tasks given to him were well estimated and timely nished, most of the times with additional efforts to satisfy client's requests.

Fullstack Freelancer & Web Designer

(2011 - PRESENT)

I have worked on many projects which vary in complexity. My favorite two that I'd like to point out are Sigma Rumors and MaxVisits.

Sigma-Rumors.com

(SEP 2014)

Developed web application which tracks product info and prices in US and EU markets of various Sigma products.

Designed and developed a WordPress theme that goes along with it as well.

☞ We gave Nikola tough task to make a customized price comparator, with features such as auto price fetching and availability alert by email.

He made a fantastic job dealing with every single technical constraints encountered while making it in a quick and efficient way.

The result is exactly what we wanted down to the smallest detail, both on the dedicated back office and on front end.

MaxVisits.com

(2011 - NOV 2013)

Responsive web application that migrated through various CMS solutions (WordPress, WHMCS, 3dCart).

Multiple redesigns along the way in 2011 and 2013 and two project owners.

Current Owner's Reference

I had an idea in my mind on what I wanted Nikola to do, he then improved upon that idea and it seemed like he was reading my mind!

He added features, I had forgotten to mention to him. I'm extremely happy with the final project. He was really responsive throughout the project, and finished it much quicker than I expected.

I would most definitely hire him again.

Project Founder's Reference

Nikola worked from day one on my website project (Maxvisits). He was very efficient and professional the all time.

I just gave him the minimum guidance on what I wanted, he quickly understood my needs and the website was made from A to Z in less than a few weeks.

*Most importantly, wonderfully made.
If I have a new project he's the one I'll contact.*

Vocational Engineer of Electrical and Computer Engineering

ICT College of Vocational Studies, Belgrade

Internet Technologies (2011 - 2014)

School of Economics and Trade, Kraljevo

Sales Specialist (2007 - 2011)

Native proficiency

\$ whoami

I am a self-taught person, quick learner and a team player.
I'm constantly working on improving myself.

My professional plan is completely oriented towards web and mobile applications.

I love to work on new products and contribute with fresh ideas in regards to business, UX and feature improvements.

What keeps me motivated at work

Answer is short and simple - 4P - Passion, Place, Price and Promotion. I'll stay motivated and will gladly contribute with fresh ideas and solutions.

Skills && Tools

Lets dive in. This is the stuff I work with everyday or have worked with. For brevity sake I've removed the stuff I have no intention of going back to (ASP.NET, Java, C# etc).

I'm closely watching at javascript scene and thinking about tools I want to be efficient in.

Web Frontend

- Javascript (ES5 & ES2015)
- React.js
- Angular
- jQuery
- HTML5 and CSS3
- Sass/Less
- Twitter Bootstrap/Foundation
- NPM Scripts/Gulp/Grunt

CMS Solutions

- Drupal 6/7/8
- Wordpress
- WHMCS

Other Skills and Software

- Sketch App
- Adobe Collection (Photoshop, InDesign, Illustrator)
- Sony Vegas

Web Backend

- PHP
- Symfony
- Laravel
- Apache Solr

Databases

- SQL (MySQL)
- Oracle SQL

Versioning

- GIT
- SVN
